

Extending .NET and Visual Studio

For developers working with Microsoft .NET Framework and Visual Studio, IdeaBlade offers DevForce™, a complete set of tools and infrastructure that “shrink the surface” of .NET to slice development time by more than half. IdeaBlade DevForce supports .NET Framework 2.0 and 3.0 and Visual Studio 2005 and runs on all Windows

platforms, including Windows Vista. DevForce supports Windows Communication Foundation (WCF) with support for Windows Presentation Foundation (WPF) planned.

IdeaBlade is one of the very few .NET tools vendors to have achieved Microsoft Gold Certified Partner status.

“IdeaBlade — .NET on rails. A framework for building service-based applications and distributed clients.”

Dan'I Lewin
Corporate VP for .NET
Business Development
Microsoft

Aligned with Microsoft Past, Present, and Future

Since 2001, IdeaBlade has been closely aligned with Microsoft's .NET release schedules, shipping our first version of DevForce with the beta of .NET Framework. Today, DevForce 3.5 supports .NET Framework 2.0 and 3.0, and IdeaBlade

is hard at work developing value-added capabilities for Visual Studio 2008, LINQ, and beyond these, Silverlight.

IdeaBlade is a member of the Microsoft Orcas Technology Acceptance Program (TAP) and is one of

only a handful of advisors to the Microsoft Composite UI Application Block (CAB) and Smart Client Software Factory (SCSF) team.

Affiliations:

- ◆ MS Gold Certified Partner
- ◆ Certified for Windows Vista
- ◆ CAB/SCSF Partner Advisor
- ◆ Member, Orcas TAP Program

Microsoft MVP Advisors:

- ◆ Rockford Lhotka, founder, CSLA, Regional Director, MVP
- ◆ Juval Lowy, founder & chief architect, IDesign, Regional Director, MVP
- ◆ Les Pinter, Pinter Consulting
- ◆ Doron Grinstein, Technical Director, Walt Disney Studios
